|                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Chief Technical Officer | Responsible for long term power system planning of the National Power System to meet the forecasted demand in least economic cost in accordance with the National Energy Policy and ensure the implementation of the Long –Term System Development Plan through timely addition of new generation, transmission and energy capacities in a transparent and competitive manner.                                                                                                                                                                                                                                                                                          |
| Chief Financial Officer | The Chief Financial Officer (CFO) holds ultimate accountability for the formulation, implementation, and execution of the company's comprehensive financial strategy. A primary mandate of this role is the macro-level management and stabilization of industry cash flow. The CFO executes this mandate by providing strategic direction, oversight, and governance across three dedicated directorates: Business Process and Risk, BSTA and Treasury Management, and Finance. By aligning these specialized functions, the CFO ensures that the organization maintains robust regulatory compliance, optimal liquidity allocation, and flawless financial reporting. |
